Mohannad Shafik

Full-Stack Developer — AI & Automation

Turnhout, België · mohannadshafik@msportfolio.be
Belgian nationality · github.com/Ms-8888 · linkedin.com/in/mohannad-shafik

PROFILE

Full-stack developer from Turnhout focused on AI and automation. I build end-to-end systems in Python and TypeScript: API, database, dashboard and AI integration via the Claude API. My projects are on GitHub; the webhook dashboard has an online demo. I'm looking for a first role as a junior developer where I can contribute quickly and keep growing.

PROJECTS

Webhook platform (ms-webhook-api + ms-webhook-ui)
Python, FastAPI, PostgreSQL, Redis, Docker · React 18, TypeScript, TanStack Query, Tailwind

- Asynchronous webhook delivery with retry logic and HMAC signing
- Real-time dashboard showing deliveries; mock mode for a demo without a backend

Knowledge assistant (RAG) (ms-knowledge-assistant)
Python, FastAPI, PostgreSQL + pgvector, React, Docker

- Answers questions about company documents (PDF, DOCX, Markdown) with cited sources, and says 'I don't know' when the documents don't contain the answer
- Local embeddings; optionally a local model (Ollama) or Claude writes the answer; measured with a 38-question evaluation set

AI Code Review (ms-ai-review)
Python, Claude API

- CLI tool that has the Claude API review code, with streaming and tool use
- Prompt caching to limit cost and latency

Codebase analyst (ms-agent)
Python, Claude API

- Agent (ReAct pattern) that analyses a codebase, with streaming, tool use and self-validation

Data quality tool (ms-data-quality)
Python, openpyxl

- Finds invalid emails, duplicate rows and company-name variants in CSV/Excel and applies only what the user approves
- Optionally a language model picks the right company name; 63 automated tests

Telegram signal platform (private project)
Python, PostgreSQL, Redis, React

- Multi-tenant platform that distributes signals to multiple Telegram bots, with a queue and subscriptions
- React dashboard; not public, but happy to walk through it in an interview

EXPERIENCE

Independent software developer — 2023 – present · Turnhout

IT technician internship, Level Academy, Birkirkara (Malta) — June 2023 · 2 weeks

- Set up network routing and remote desktop for a gaming room with multiple PCs
- Assembled workstations and installed peripherals
- Installed and tested security cameras

EDUCATION

Higher education, ICT / Programming (University of Antwerp, AP University of Applied Sciences, Thomas More) — Sep 2023 – Jul 2026 · not completed

Computer Management (ICT), Campos Turnhout — Jan 2022 – Jun 2023 · EQF level 4 · diploma obtained

- Software, hardware and office software

SKILLS

Strong: Python, TypeScript/JavaScript, React, FastAPI, PostgreSQL (pgvector), Redis, Docker, Git/GitHub, REST APIs
AI: Claude API (agents, tool use), prompt design, RAG and embeddings, Claude Code (hooks, agent workflows)
Also: SQL, HTML/CSS, Tailwind, Nginx, pytest, GitHub Actions
School-level: Java, C#, PHP

LANGUAGES

Dutch (native) · Arabic (native) · English (C2) · French (B1)
